FOR IMMEDIATE RELEASE

PRESS RELEASE

Execulink connects first Fibre-to-the-Home customers in Delhi and accelerates timelines

Delhi, ON – December 4, 2014 – Execulink Telecom has announced that they are deploying their Fibre-to-the-Home project in Delhi faster than originally intended.

“With the interest we have seen in Delhi we have opted increase the speed in which we are laying Fibre in the ground” said Ian Stevens, CEO of Execulink Telecom. “We are looking forward to serving you sooner” continued Stevens “and will announce the next build area on January 15, 2015, two and a half months ahead of schedule”.

Alongside of the accelerated timeline Execulink has also announced they have connected their first customers in Delhi. John Luciani, a local Delhi resident, is one of these customers and is very pleased with the service so far. “So far it’s been wonderful, the installer was quite good – excellent in fact – and it’s running beautifully”, expressed Luciani.

Execulink construction crews are deploying the Fibre infrastructure throughout Delhi and now they are installing the service within individual homes. When asked about his first Fibre internet experience, Luciani went into detail about his wife Carol’s experience with an online photobook retailer, “With our pervious service we had nothing but trouble, with lots of buffering” Luciani explained “but with the Fibre service it went seamlessly.”

Delhi residents who are looking for more information on connecting their home with Fibre-to-the-Home, can stop by Execulink’s office located at 553 James Street, Delhi.

About Execulink

In operation since 1904, Execulink Telecom has evolved from a small independent local telephone company into one of the leading telecommunications providers in Ontario. Through innovation and forward-thinking, we cultivated our local telephony offerings to provide a full-scale suite of

telecommunications services including data, internet, cable television, mobility and advanced voice features. These services are now available to all levels of industry, encompassing 50,000 business, enterprise, government, and residential customers.
